 Only use on this Seat if a lap and diagonal Seat belt is fitted.

## Know your new booster seat

1. Shoulder strap guide
2. Shoulder strap adjuster
3. Shoulder strap
4. Armrest
5. Cover

## Installation

Place the booster in your car and make sure that it is closely against the backrest of passenger seat.

Set your child on the booster. Adjust the shoulder strap adjuster(2) to make sure the shoulder strap(3) is long enough for the red shoulder strap guide(1) to lie on your child's shoulder.

Fasten the seat-belt across your child. The lap section of the belt should sit as forward as possible over the hips and pass under the armrests(4) on either side of the booster, then buckle up. Adjust the seat-belt to fit your child's body, and remove the slack as much as possible, and make sure the seat-belt is not twisted.

Attach the red shoulder strap guide to the diagonal section of the seat-belt. Make sure that you attach it just above your child's shoulder as shown left. This ensures that the seat-belts sits correctly over your child's shoulder and not across their neck.

Your child now is secured. To release your child simply undo the seat belt.

## Cleaning the cover

The cover is washable. To remove the cover, put elastic strips away from the hook underneath the booster. Please read the washing label on the cover for the washing instructions.

DO NOT tumble dry the cover, drip dry only.

To replace the cover, position on the booster, and put the elastic strips back to the hooks.

## Further advice

If you need further help or advice on using or fitting the booster, please contact local dealer.

## Cleaning & Maintenance

**Important:** The cover is a safety feature. Never use the child seat without it. Don't put your child's safety at risk by using other makes of replacement cover, could stop the child seat from protecting your child as well as it should.

European safety child seat is sweeping the whole world now

European safety standard

According to the product's quality, the requirements of the safety child seats is much more higher in the European county. The latest ECE R44/04 standards went into effect at june of 2006, the standard high tested by more realistic collision testing. Makes more strict stipulates for the head protection and safety belt system etc... make it as the most strictest standard in the world.
